

Congratulations for choosing the next generation Dabblers! This instruction manual should get you on your way to vaporizing in no time. Please don't hesitate to contact us if you need assistance. Vaporbrothers provides the sales and support for the Dabblers and backs all parts with our no-hassle warranty. Enjoy your new Dabblers Vapor Pen!

Contents of the kit:

- Battery with Built-In Charger
- Heater
- Cone
- Mouthpiece
- Pick Tool
- Mini USB Adapter
- Case

The Dabblers™ is an electronic dabbling device which employs specialized temperature and timing control circuitry to assure a superior vaporization experience. The advanced microcontroller is combined with a high-capacity rechargeable lithium polymer battery to provide 200-400 inhalations on a single charge. All materials used in the Dabblers's construction are of the highest quality, from the stainless steel housing to the ceramic heating chamber.

*Our team is excited to share this new creation with you, the cutting edge connoisseurs of herbal supplements.*

## Getting Started:

Please take a look at the parts in your kit. Dabblers are thoroughly tested, but if you see something wrong please tell us right away. **Carefully follow the directions to charge your Dabblers and test it before applying any oils.** We only exchange defective parts before the parts are oily, with the exception of the battery which can be exchanged any time up to 1 year from purchase. See warranty info at the end of this document for more info.

**Charge your Dabblers fully before first use to avoid damage to the battery.** The mini USB charging port is at the bottom of your pen under the cap. The red LED on the bottom will turn off when the charge is complete.

## Push-Button Lock-Out Feature:

Dabblers ship in their OFF state. **Push the button 6 times rapidly to unlock your Dabblers.** The button LED light will blink 3 times to indicate that the battery is ON.

## Using your Dabblers:

Before using your dabbler, screw the heater onto the battery.

**If you're using your Dabblers for the first time, please push and hold the button to familiarize yourself with the operation of the Dabblers and ensure it works correctly.**

Note that the heating coil will stay on for 10 seconds at a time and burn off any dust that may have settled during shipping. Remember, we cannot exchange your heater once it's been used with oils or extracts. Now is the time to test your unit dry and confirm all is well.

Using the pick tool, place a small amount of herbal extracts directly onto and around the heating coil. Be careful not to dislodge the heating coil if your extracts are highly viscous. The Dabblers will handle up to about 1/8" around (4mm).

If the extracts are not staying in place, push the button briefly to melt them onto the coil.

Screw all parts of the Dabblers together and inhale lightly while pushing the button. You may push up to 10 sec at a time. After 10 seconds, the Dabblers will blink 8 times turning off momentarily to protect the battery. After 2 seconds of rest time the Dabblers is recovered and ready to use again.

Unscrew the Dabblers to visually inspect the ceramic bowl. Apply more herbal extract as needed.

The number of puffs you get from one loading will depend on the quantity and quality of herbal material, as well as the size of the inhalation. Expect about 4-10 inhales before reloading.

## ***Important notes to preserve your Dabblers in top shape:***

- Keep the charge topped off to maximize performance and battery capacity.
- Do not operate the Dabblers for extended times while there is no herbal material on the heating coil.
- Protect the Dabblers from shock, temperature extremes and moisture.
- The Dabblers's battery and heater may be damaged if used with other vapor pens and such use voids the warranty.

## Where to Get Replacement Parts:

Your heating element is an expendable item and needs to be replaced periodically. It is convenient to have extras on hand as backup and if you wish to travel.

Check with your local retailer to see if they carry spare parts. Avoid using any other brands. Genuine Dabblers parts are available online at [www.vaporbrothers.com](http://www.vaporbrothers.com)

## Cleaning the Dabber:

This is an electronic instrument that is sensitive to water and moisture. Wipe the outside clean with a dry cloth.

The screw threads around the ceramic bowl can be cleaned with isopropyl alcohol swabs.

Clean the bowl regularly by running the heater for 10 seconds and inhale strongly to dislodge any clogs. Operate the Dabber upside down to eliminate oily residue buildup at the bottom of the bowl.

Soaking the heater in alcohol is not recommended. If you wish to use alcohol, use 91%-99% isopropyl alcohol ONLY. Handle high purity alcohol with care. **Avoid probing into the bowl as this may dislodge the heating coil and its glass core.**

## Storing the Dabber:

Store your Dabber in its case whenever possible. Use the lock-out feature if placing it in your pocket.

## More Information About the Dabber:

### ***How does it work?***

The heater rapidly heats the herbal formula to the vaporization point. You can discreetly and easily vaporize your herbal materials anywhere.

### ***Does Dabber use an “atomizer cartridge”?***

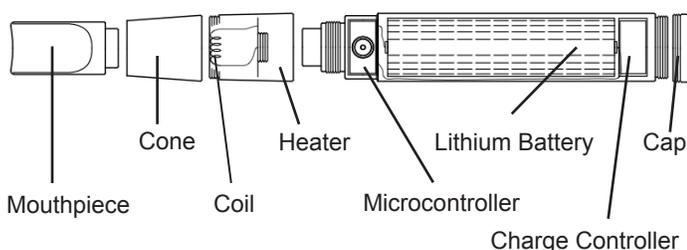

No way. Atomizer cartridges are filled with special liquid formulas of propylene glycol and/or glycerine to create a “fog machine” mist. The Dabber only requires your 100% herbal extract to operate.

### ***How does The Dabber compare to other vapor pens?***

The Dabber may look like other products on the market but the similarity ends there. The Dabber’s designer chose the best lithium battery available and paired it with a microprocessor temperature control and onboard charger to maximize performance and battery life. The Dabber’s heater does not contain plastic or any questionable metals.

### ***What’s Inside Your Dabber?***

The dabber is a precision electronic device and it utilizes a “smart” microcontroller circuit to control it’s functions. Here is a look at what’s inside:

## Warnings & Disclaimers:

This device has hot surfaces to evaporate the active ingredients and these surfaces should not be touched during use.

The Dabber™ is only to be used with the recommended vaporizing medium (herbal extracts). The use of other substances may give rise to a toxic or fire risks.

The statements on these instruction pages have not been evaluated by the Food and Drug Administration. The product listed is not intended to diagnose, treat, cure or prevent any disease.

This document is for informational purposes only. We are not advising or prescribing herbs for any specific medical condition or for any specific use. Consult your doctor before starting any herbal regimen.

This device is not intended for use by persons (including any person under the age of 18) with reduced physical sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the device by a person responsible for their safety.

## Where to Get Help:

We are happy to help you have the best experience possible. Send any questions or comments to [support@vaporbrothers.com](mailto:support@vaporbrothers.com). We will get back to you within one business day.

The Dabber is backed by a limited mail-in warranty which covers manufacturing defects only. Proof of purchase is required. We do not cover damage from misuse or use with other vapor pens. Dabber’s battery is covered for 1 year from the date of purchase. All other parts are covered for obvious defects up to 90 days from purchase.

We will offer a replacement for the heater if it does not work the first time you warm it up (without oils inside).

## **Follow our instructions above to test your Dabber before you use it with oils.**

Please note: we do not cover any parts once they are used with oils except the battery. If you believe you have a defective product, please contact us at [support@vaporbrothers.com](mailto:support@vaporbrothers.com).
